Profile Summary

I am a software engineering student at SMK Telkom Malang, very passionate about technology and data research. My valuable skills include teamwork, problem solving, critical reasoning, creativity, and basic website development. I am familiar with HTML, CSS, and Javascript, and currently focusing on mastering Node.js and React.js technologies for more advanced web development. The desire to learn and adapt quickly is my strength, which allows me to overcome challenges in the ever-evolving world of technology as well as contributions that drive innovation in software development.

Activities & Projects

Library Borrowing and Returning Facility (Perpustakaan Telkom)

March 2022 - Now

- Integrated book search features based on titles, authors, or categories to facilitate access to information.
- Implemented a notification system to alert users about book return deadlines and late fines.
- Managed the database of book borrowing and returning, including recording borrowing dates, return dates, and book statuses.

Head of Public Relations (Community of Moklet English Debaters)

November 2022 - Now

- Interacted and coordinated with internal team members such as the President, Treasurer, and Secretary to ensure alignment of organization's messages and activities.
- Organized regular meetings with the team to coordinate tasks and develop new communication initiatives.
- Participated in training sessions and routine meetings to enhance debate skills.

Frontend Developer Trainee (Teaching Factory Telkom DBT)

March 2022 - March 2023

- Acquired and mastered fundamental frontend development skills, including HTML, CSS, and JavaScript.
- Collaborated with development and design teams to transform designs into appealing and intuitive frontend code.
- Conducted testing and debugging to ensure optimal performance and functionality of websites.
